

DELAWARE VALLEY CHAPTER OF THE NORTH AMERICAN ROCK GARDEN SOCIETY

Bog Garden Workshop

Saturday, June 23 at 10 AM
at Aquascapes, Pipersville, PA

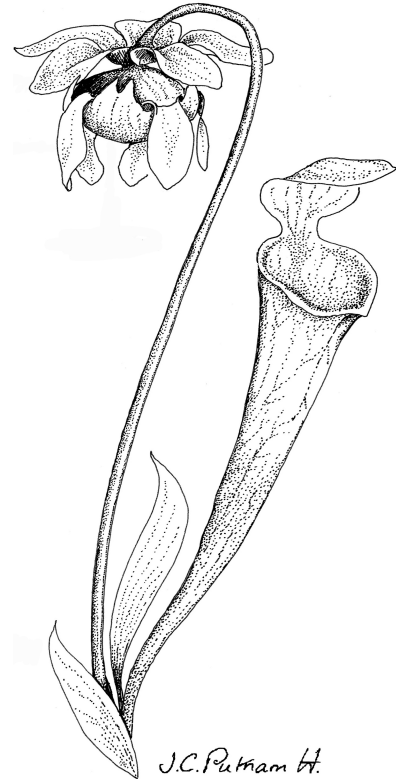

Bog gardens provide a place to grow rare and wonderful plants: carnivorous plants, native orchids, cranberry, and more. They are also fun and appealing to children.

Make your own bog garden in a container. Our workshop includes:

- A talk on wild bogs in eastern North American and on creating and maintaining bog gardens.
- A hands-on session to make a bog garden. You'll take home a container planted with pitcher plants, an orchid, and other plants
- The chance to shop the extensive selection of wetland plants at Aquascapes, which is normally wholesale only.

Limited to 25 workshop participants. We also have a limited number of places for members to attend but not make a bog; this is free, but you must register.

Questions? Contact Janet Novak, botany@indri.org or (215) 248-2642.

Registration for the **Bog Garden Workshop** on June 23.

Name(s) _____

Address _____

City and State _____
